

PATE1000 EF ATHLETIC WHITE

EF Athletic White PATE1000 is a high gloss ink with superior stretch designed specifically for nylon and tightly woven fabrics. This ink has good opacity and hand, great coverage and fiber mat down, with good to great printability. PATE1000 has a medium body and tack that achieves excellent adhesion on nylon, nylon/Lycra and spandex. This is a cost effective high gloss option when printing dye stable sports uniform fabrics.

Highlights

- High Gloss.
- Superior Stretch.
- Excellent adhesion on Nylon.
- Can be used on non-dyed poly.
- A cost effective solution.

Printing Tips

- Use any direct emulsion or capillary film compatible with plastisol inks.
- Athletic Gloss inks should be printed through a coarse mesh screen in order to produce a thick deposit of ink.
- Placing a soft surface such as a silicone rubber pad on the platen will help print a thicker layer of ink.
- Two or three strokes may be necessary to drive the ink into the garment and still leave a thick film on top.
- For maximum deposit use soft or medium durometer squeegees with rounded or beveled edges.
- Do not dry clean, bleach, or iron the printed image.

Compliance

- Non-phthalate
- Internationally compliant
